

In the Specification:

Please replace the paragraph beginning on page 12, line 19 with the following:

The information processing equipment is provided with a rectangular-parallel piped parallelepiped housing 100 as a main enclosure, for example, made of a metallic material, wherein a front shelf 102 serving as a first substrate housing frame body is provided at a front side of the housing 100 and a back shelf 104 serving as a second substrate housing frame body provided at a rear side thereof. Substrate housing parts 106 are individually installed in the shelves 102, 104, and one or plurality of substrate units 108, onto which various circuit units such as electronic equipment and so forth are mounted, are detachably housed in the substrate housing parts 106. Guides 109 are installed in the shelves 102, 104, and the substrate units 108 are mounted in the substrate housing parts 106 while guided by the guides 109. In this case, the substrate units 108 are housed in the front shelf 102 side from the front part thereof and the substrate units 108 are housed in the back shelf 104 from the rear part thereof. The substrate housing parts 106 of the shelves 102, 104 are partitioned by a back panel 110 installed at the rear part side of the front shelf 102.
